

LOT® Design Lab, Inc.

Summer 2026 Commission (proposal)
Future Design — 4D UI

As we are experiencing singularity and a transition to the age of Aquarius the society is undergoing a significant transition. The entire industry apparatus is being transformed into a super computer powered singular device.

The opportunity for the brands, corporate and individual business is enormous, however the transition is not apparent for many. The year 2026 and especially the summer of 2026 is a liquid competitive advantage and a historic business concern.

Vadim Marmeladov, the renowned designer and entrepreneur is offering his services for the transition. The documented work, design and corporate understanding allow LOT® Design Lab to offer a significant competitive advantage through design, including forbidden early terms such as Astrology, Spirituality, Art, Graphics, Symbolism.

The infamous and internationally recognized track record among tech-elite is present. The history of excellence and delivery, including physical prototypes and successful IPO-ready products and companies is well documented online. We are offering hands-on corporate workshops to serve corporate design and art units.

We take one client at a time to guarantee personal and intimate work, delivery and long-term satisfaction. The work may include product roadmaps, innovative corporate structures (Usership) and advanced understanding of computer-science. Our presence within the tech community, the Made in California (Los Angeles) tag and a handpick of celebrity clients demonstrates the quality of work and dedication. All work is formally documented, including non-conflicting IP distribution, network and lean approach.

Executive Summary:

The global industry is undergoing a monumental transition as traditional technology platforms consolidate into unified, supercomputer-powered ecosystems, creating a critical but temporary window for brands to secure a permanent competitive advantage.

To navigate this shift, LOT® Design Lab—led by renowned designer and entrepreneur Vadim Marmeladov—offers exclusive, hands-on workshops and full product delivery services for corporate design and art units.

Price:

1 day video consultation: \$11k

1 week executive workshop: \$100k

Further work:

Full product delivery, including a functional prototype and executive product run (100 units): \$100k/month with 9 months delivery (\$1m contract, 50% advance); structured as:

3 months digital prototypes; tangible R&D delivery

3 months executive design review; physical prototypes

3 months user tests; production (within your corporate design unit)

3 months product delivery, curated manufacturing
